

Founded in 2004, Intelligent Foods On Demand (IFOD) is a privately held vending company based in Long Island City, New York. Featuring a wide range of products from snacks, beverages and household items to treats for pets, IFOD provides the amenities customers want, 24 hours a day. Our combined platform of vending and ATM services offers a variety of high-end products sold from brand new, state-of-the-art equipment.

We significantly improve amenities at all our locations and provide an all-inclusive service to our clients at NO COST to them. Inspired by a trip to Japan, a leader in the vending industry, we greatly expanded our product selection, added latest-to-market payment options, and implemented most recent technology enabling us to remotely monitor our entire offering.

Our customers include nation's most prominent luxury real estate developers, management companies, hospitals, hotels, schools, and various corporate offices.
